# Key Technologies

Backend

NodeJS

- Handled multiple simultaneous connections.
- It works better alone but we paired it with a web framework called **ExpressJS.**

ExpressJS
- Lightweight NodeJS web application framework.

Database

MongoDB
- Highly available & Highly Scalable.

Frontend

ReactJS
- We can make whatever we need as components.
- Boosts the speed of the development process.

System Architecture
- MVC – Model, View and Controller Architecture
